
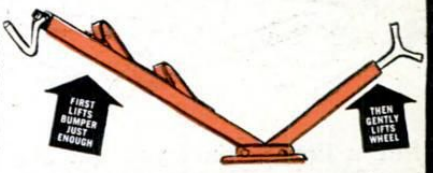
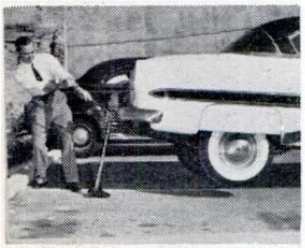
NEW "DYNAMIC TRIANGLE" AUTO JACK LIFTS TWO TONS WITH A PIECE OF THREAD!

BRILLIANT AMERICAN ENGINEER MAKES FIRST ADVANCE IN MANUAL LIFTING IN 2500 YEARS—since Archimedes' invention of the hydraulic screw. This fascinating and immensely practical invention is the talk of the automotive industry. This is the first automotive lift or jack to use the "dynamic triangle" principle instead of the straight line lift. It is now in production and can now be purchased by mail.

STUDY THIS DRAWING

When the handle is turned this DOUBLE LIFT jack FIRST lifts the car body JUST enough to clear the wheel. Then when the weight of the car body on the REAR leg of the triangle builds up, a part of this weight is transferred in the form of lifting energy to the FORWARD leg of the triangle—gently raising the wheel off the ground. The "V" on the forward leg engages the solid axle of all passenger cars and light trucks. First lifts bumper, then lifts wheel. Supports both bumper and wheel.

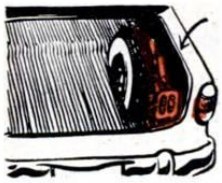




EVER WORRIED ABOUT THIS?

HAVE YOU EVER HAD YOUR CAR FALL OFF THE JACK? It can't happen with the Double Lift jack. PUSH HARD forward, PUSH sideward. Unless you have enough manpower to literally tip your car over, you cannot cause this common and dangerous accident to happen. You can even drive your car forward slowly if a front wheel is jacked up. This new invention will stay in place. TRIANGULAR SUSPENSION MAKES CAR RESIST MOVEMENT. When the Double Lift Jack is in use, the front or rear end of your car is actually resting on an inverted tripod (two jack legs and opposite wheel). With conventional jacks the car is resting on *two* points (jack itself and opposite wheel). With two point suspension, the car can roll off if the other wheels are not braked or blocked. With three point suspension it can't. Sounds tricky and it is, but just try it. Here's another way to put it. The principle is the same. You can walk away from a camera tripod and it'll stay there. Try walking away from a bipod.

The DOUBLE LIFT "DYNAMIC TRIANGLE" JACK is in production and in limited stock at the factory NOW. GIVE IT THESE TESTS—if you don't think it performs better than we say, ship it back and we will return your money.



FOLDS UP—FITS IN ANY TRUNK

DISTRIBUTORS - DEALERS — Double-Lift Jacks now in full production. Write for full sale details.

USE IT ON A TREACHEROUS SIDE HILL

USE IT ON A STEEP HILL

Here is a jack your wife or teen age daughter can use with ease when you're not there—and you don't have to worry about "jack" accidents. Send this coupon in with your check, cash or money order.

$13.95 Postpaid in U.S. only

MID-CONTINENT MFG. CO., INC.
3613 Aviation Blvd., Manhattan Beach 2, Calif.

Gentlemen:

Please ship me immediately____DOUBLE LIFT jack(s) @ $13.95 each including shipping cost, on money back guarantee. (Or send $5, balance C.O.D.)
